Response to Amendment

The following is in response to the amendment filed on May 5, 2003.

Claims 1, 3, 5-25, 27, 29-49, 51, and 52 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest a web producing machine having the combination of a water-permeable continuous carrying belt (e.g., forming wire), a drying cylinder, a shoe press unit that forms a nip with the drying cylinder, a suction roll located before the shoe press in the web travel direction, and an overpressure device surrounding the suction roll, whereby the forming wire is used to transport the formed web from a forming roll through each of the dewatering devices, and to the transfer point at the drying cylinder, and further whereby the web is a tissue or hygiene web that travels at a speed of over 1800 m/min (approx. 5900 ft/min). Similarly, the prior art does not disclose or suggest a process for producing a tissue or hygiene web at a speed greater than 1800 m/min utilizing the above combination of devices.

The claimed machine speed well exceeds that of most prior art tissue making machines. The current "speed record" is about 2100 m/min. Prior art tissue machines running above 4000 ft/min utilize other devices such as transfer felts, air presses, or throughdryers, or combinations thereof. The use of a suction roll/overpressure device and a shoe press/drying cylinder allows the use of a single transporting wire to achieve speeds obtainable only on prior art paper

machines having different configurations. Such a claimed combination also does not exist for other types of paper making or for running at lower machine speeds.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
